

SHIELDS ENVIRONMENTAL ENERGY POLICY

Protection of the environment is central to our business strategy.

Shields Environmental is committed to minimizing our energy consumption, energy costs, greenhouse gas emissions and carbon footprint.

Maximizing energy efficiency is an investment in the long term viability of the organization, and a core contribution towards the sustainability of our operations.

We will:

- Set annual targets for energy efficiency as part of our Management System that is certificated to ISO 14001:2004 and registered with EMAS
- Maximize the use of renewable energy
- Increase the awareness of all staff regarding energy efficiency. We believe that everyone in our company shares the responsibility for protecting the environment and its natural resources.
- Conduct site energy surveys to identify opportunities for energy reduction and conservation
- Implement all cost effective energy efficiency measures, such as the use of route planning software and the installation of various energy conservation products
- Ensure that energy efficiency and carbon emissions are considered in business decisions
- Engage our customers and suppliers to develop business processes that are more energy efficient
- Assist our customers in reducing their carbon footprint with our waste management/re-use and energy conservation services
- Continue to research the energy conservation market in order to be able to continue to offer our customers state of the art energy conservation products

We shall distribute a copy of this policy to all employees via our bulletin boards, and to other organizations and the public via our web site.

A handwritten signature in dark ink, appearing to read "Ruben Peijnenborgh", is written over a circular stamp or seal.
